
ANAND M NAMBIAR

AI/ML ENGINEER

Bengaluru, Karnataka, India · +91 9845672412 · anandmnambiar@gmail.com

[LinkedIn](#) [GitHub](#)

PROFESSIONAL SUMMARY

AI/ML Engineer with a B.E. in Artificial Intelligence & Machine Learning and hands-on experience across Machine Learning, Generative AI, and Python, focused on developing and evaluating AI solutions.

PROFESSIONAL EXPERIENCE

AI Platform Engineer (LLM Evaluation) - Freelance

Apr 2026 - Present

Snorkel AI

- Evaluate LLM responses using challenging mathematical and reasoning-based tasks to identify model failure cases.
- Analyze model responses against expected solutions and project-specific evaluation criteria.
- Work with AI evaluation workflows and collaborate with teams on task requirements and model behavior.

AI Engineer - Associate

Dec 2024 - Feb 2026

Highbrow Technology

- Worked on data cleaning, annotation, validation, and traditional ML workflows, supporting model development and deployment.
- Worked on LLM-based applications, including document summarization and response evaluation to identify model errors and improve output quality.
- Developed multi-agent workflows using LangGraph for document analysis and question answering, with Langfuse used for tracing and evaluation.
- Built RAG workflows combining embeddings, vector retrieval, and knowledge-graph context to provide relevant information to LLMs.
- Worked on LLM evaluation and contextual retrieval, assessing response relevance, grounding, and failure cases.

Quantum Computing Intern

Jan 2024 - Jun 2024

Cambrian Consultancy Center | Bengaluru

- Studied quantum algorithms and computational models using Qiskit.
- Explored practical applications of quantum computing through technical and research-oriented work.

EDUCATION

Bachelor of Engineering in Artificial Intelligence & Machine Learning

2020 - 2024

Cambridge Institute of Technology, Bengaluru

KEY PROJECTS

Deepfake Video and Text Detection using LSTM · [Python](#), [PyTorch](#), [ResNeXt50](#), [OpenCV](#), [Django](#)

- Developed a deepfake video detection model combining ResNeXt50 for spatial feature extraction with LSTM for temporal sequence analysis.
- Preprocessed videos using frame extraction, face detection/cropping, 112×112 resizing, and 60-frame sequences.
- Integrated the model into a Django application for video upload, inference, confidence scoring, and REAL/FAKE prediction.

Hand Gesture Recognition · [Python](#), [TensorFlow](#), [OpenCV](#), [MediaPipe](#)

- Developed a real-time hand gesture recognition system using MediaPipe hand landmarks and TensorFlow.
- Extracted 21 hand keypoints from webcam frames and processed them for gesture classification.
- Implemented real-time recognition across 10 gesture classes, enabling the system to identify gestures directly from live video input.

Claude Changelog RAG Agent · *Python, RAG, Embeddings, Vector Search*

- Built a RAG pipeline using document processing, embeddings, and vector retrieval to answer questions from the Claude changelog.
- Implemented retrieval-based context grounding to improve answer relevance and reduce hallucinations.

Federated Learning for Distributed Systems · *Python, Machine Learning*

- Implemented a federated learning workflow for training models across decentralized datasets without directly sharing raw data.
- Explored distributed model training and aggregation across participating clients.

AI-Based Resume Screening System · *Python, NLP*

- Built an NLP-based resume screening system to compare candidate resumes against job descriptions.
- Used text processing and similarity-based matching to rank candidates based on job relevance.

Kidney Stone Detection using Digital Image Processing · *Python, OpenCV*

- Developed an image-processing pipeline for kidney stone detection using preprocessing, segmentation, edge detection, and feature extraction.
- Applied image-processing techniques to identify relevant visual patterns in medical images.

CERTIFICATIONS

- Apache Spark – Databricks (2025)
- Microsoft Certified: Azure AI Fundamentals (AI-900)
- Microsoft Certified: Azure Fundamentals (AZ-900)
- Accenture Data Analytics & Visualization Simulation – Forage
- Infosys Certified: Artificial Intelligence
- Infosys Certified: Deep Learning
- Infosys Certified: Natural Language Processing

TECHNICAL SKILLS

AI/ML Concepts: Machine Learning, Deep Learning, Generative AI, RAG, Agentic RAG, Vector Search

Languages & Frameworks: Python, LangGraph, LangChain, Langfuse, TensorFlow, Keras, Scikit-learn, OpenCV

Data & Cloud: Pandas, NumPy, Azure, Apache Spark
